

On-Demand Mandatory Training Courses

MBC, Inc. can now help your company to meet **OSHA** and **Corporate** Human Recourses **Mandatory Training Requirements** with On-Demand Training Courses. Key OSHA Mandatory Training Requirements include that companies provide training that focuses on specific workplace hazards (i.e. fork truck, lock-out-tag-out, fire extinguisher). OSHA also recommends keeping records of all training and providing workers with a way to participate in safety training programs.

Below is an example of a custom On-Demand training program that is helping a company to meet both OSHA and Corporate mandatory requirements:

On-Demand Training – Monthly Topics for All Production Personnel	
Month	Topics
February 2022	Personal Protective Equipment
